1. Welcome to BhojanOS

BhojanOS is a multi-tenant restaurant operating system that gives you a branded online storefront, owner dashboard, order management, delivery tools, and growth intelligence — with zero commission on every order. You pay a flat monthly software fee only when you accept live customer orders (Growth plan and above). Building and customizing your storefront is always free.

What this guide covers

- Platform technology and how your store runs in the cloud
- Installing BhojanOS as a mobile app (PWA) on your phone
- Creating your owner account and step-by-step store setup
- Every screen in the owner portal — Dashboard, Orders, Menu, Settings, and more
- Plans, trials, and which features unlock on each plan
- The complete customer journey from browsing your menu to order delivery
- Day-to-day operations: accepting orders, dispatching riders, going live/offline
- Compliance (KYC), referrals, marketing campaigns, and troubleshooting

2. Platform Architecture (How It Works)

2.1 Technology stack

Layer	Technology	Purpose
Frontend	React 19 + TypeScript + Vite	Storefront, owner portal, marketing site
Styling	Tailwind CSS 4	Responsive mobile-first UI
Backend API	Node.js 20 + Express on Render	Orders, payments, owner provisioning, KYC uploads
Database	Firebase Firestore (bhojanos-prod)	Tenants, menus, orders, users, notifications
Authentication	Firebase Auth	Email/password and Google sign-in
File storage	Firebase Storage	Menu images, KYC documents, logos
Payments	Razorpay + Cash on Delivery	Customer checkout
Push alerts	Firebase Cloud Messaging (FCM)	Order alerts on owner devices
Hosting	Vercel (frontend) + Render (API)	Production at bhojanos.com
PWA	Service Worker + Web App Manifest	Install to home screen like a native app
Optional native	Capacitor 8	Android/iOS wrapper if needed

2.2 Multi-tenant design

Each restaurant is a "tenant" identified by a unique slug (e.g. mana-inti). Your storefront lives at <https://www.bhojanos.com/k/{your-slug}>. Your owner portal is at <https://www.bhojanos.com/owner/dashboard>. All data is isolated per tenant — your menu, orders, and customers belong only to your kitchen.

2.3 Key URLs

Purpose	URL pattern
Marketing / signup	https://www.bhojanos.com/onboard
Owner register	https://www.bhojanos.com/owner/register
Owner login	https://www.bhojanos.com/owner/login

Purpose	URL pattern
Owner dashboard	<code>https://www.bhojanos.com/owner/dashboard</code>
Your storefront	<code>https://www.bhojanos.com/k/{slug}</code>
Customer menu	<code>https://www.bhojanos.com/k/{slug}/menu</code>
Order tracking	<code>https://www.bhojanos.com/k/{slug}/order/{orderId}</code>
API (backend)	<code>https://manaintibojanam-backend.onrender.com</code>

3. Installation — Add BhojanOS to Your Phone

BhojanOS works in any modern browser and can be installed as a Progressive Web App (PWA) so you get fast access, full-screen mode, and order notifications — without downloading from an app store.

3.1 Automatic install prompt

- When you visit `bhojanos.com` on mobile, an Install banner may appear after ~30 seconds or when you add items to cart.
- Tap Install to add BhojanOS to your home screen.

3.2 Manual installation

- Android (Chrome): Menu ("⋮") ! Install app / Add to Home screen
- iPhone (Safari): Share button ! Add to Home Screen
- Desktop (Chrome/Edge): Address bar install icon or browser menu ! Install

3.3 App updates

When a new version is deployed, you will see an update prompt. Tap Refresh to load the latest features. If the app behaves oddly after an update, close it completely and reopen from the home screen icon.

4. Owner Account — Registration & Login

4.1 Create your account (/owner/register)

1. Visit `bhojanos.com/onboard` or tap Start Free Storefront ! Register.
2. Enter your full name, restaurant name (this becomes your store slug), email, and password. Google sign-in is also supported.
3. Complete reCAPTCHA security check (when enabled).
4. System validates your email and creates your Firebase account.
5. Backend provisions your tenant: creates your kitchen record and links it to your owner profile.
6. Welcome email is sent with your store link.
7. You land on `/owner/dashboard` — setup guide appears if store is not yet complete.

Important: Storefront setup is always free. Live customer orders require the Growth plan. When you publish your store, a 14-day Growth trial starts automatically — no credit card required.

4.2 Returning owner login (/owner/login)

- Sign in with email/password or Google using the same method you registered with.
- If you have an existing store, you are taken directly to the Dashboard.
- If no store is found, you are guided to register.
- Login uses a lightweight fast-loading page optimized for mobile.

5. Store Setup — Guided Onboarding (8 Steps)

After registration, complete these steps to publish your store. Total estimated time for required steps: ~25 minutes. Progress is shown on your Dashboard via the Store Setup Guide.

Step	Task	Where	Required	Time
1	Confirm your account	/owner/setup?step=1	Yes	~1 min
2	Name your kitchen	/owner/setup?step=2	Yes	~2 min
3	Add kitchen address	/owner/setup?step=3	Yes	~3 min
4	Set delivery zones (km)	/owner/setup?step=4	Yes	~2 min
5	Choose payment methods (COD/Razorpay)	/owner/setup?step=5	Yes	~2 min
6	Add menu (minimum 3 items)	/owner/menu	Yes	~10 min
7	Verify mobile number	/owner/kyc	Optional*	~3 min
8	Publish your store	/owner/setup?step=7	Yes	~2 min

* Mobile verification is optional during sandbox testing but recommended before full launch.

5.1 Setup wizard details

- Step 2 — Kitchen name: This is what customers see on your storefront and receipts.
- Step 3 — Address: Used for delivery distance calculation. Pin exact location.
- Step 4 — Delivery: Set free-delivery radius and maximum delivery distance in kilometres.
- Step 5 — Payments: Enable Cash on Delivery to start immediately. Add Razorpay online payments after KYC.
- Step 6 — Menu: Import the Cloud Kitchen starter template OR add dishes manually in Menu Builder. Items need prices to be orderable.
- Step 8 — Publish: Sets onboarding complete, activates 14-day Growth trial, makes storefront public.

You can save progress and exit to Dashboard at any time. Click any step in the Store Setup Guide to jump directly to it.

6. Owner Portal — Complete Feature Reference

The owner portal is organized into four groups: Run your kitchen, Your store, Grow sales, and Account.

6.1 Dashboard (/owner/dashboard)

- Store Setup Guide — progress bar and next-step links until go-live
- Store Live Control — toggle accepting orders ON/OFF for today
- Status bar — orders today, payouts, delivery status, urgent alerts
- Share store — copy link and WhatsApp share templates
- Kitchen health score and customer segment summary
- AI growth recommendations and inventory alerts
- Priority actions and release notes

6.2 Orders (/owner/orders)

- Real-time order queue — new orders appear instantly with sound alert
- Status pipeline: Pending ! Accepted ! Preparing ! Out for delivery ! Delivered
- Reject or cancel orders when needed
- Dispatch modal — assign delivery partner (Rapido, etc.), rider name, tracking URL
- Notify customer on status change
- Quick stock edit — mark menu items out of stock from order screen

6.3 Menu Builder (/owner/menu)

- Add, edit, delete menu items
- Upload photos with automatic WebP compression
- Fields: name, description, price, category, veg/non-veg, availability toggle

- Minimum 3 items required before customers can order

6.4 Storefront Settings (/owner/settings)

Tabs: General | Hours | Location | Payments | Promotions | Notifications

- General — kitchen name, WhatsApp number, logo upload, delivery notes
- Hours — business hours; integrates with Store Live Control
- Location — address, map pin (lat/long), delivery radii, base fee, per-km fee, GST, packing charges
- Payments — toggle COD and Razorpay
- Promotions — create coupon codes and offers
- Notifications — configure alert preferences

6.5 Compliance / KYC (/owner/kyc)

- Step 1: Merchant legal declaration
- Step 2: Business identity — owner name, mobile, PAN, business details
- Step 3: Document upload — identity proof, FSSAI licence number
- Status: Not Started | Draft | Pending Review | Verified
- Required for full compliance; overdue KYC can restrict publishing and marketing features

6.6 Delivery Intelligence (/owner/delivery) — Pro plan

- Average delivery distance and success rate
- Top delivery areas from order history
- Out-of-bounds delivery attempts
- Helps optimize zones and staffing

6.7 Customers (/owner/customers) — Growth plan

- Customer memory built from order history
- Search by name, phone, or favourite dish
- One-tap WhatsApp and phone call actions

6.8 Growth / Marketing (/owner/marketing) — Growth plan

- Customer segments: inactive, lost, repeat, VIP, birthday, festival, referral
- AI-generated campaign copy for WhatsApp, SMS, Instagram
- Coupon code generation and copy-to-clipboard

6.9 Inventory / Recipes (/owner/recipes) — Pro plan

- Link menu items to ingredient lists with quantities
- Powers predictive supply and inventory alerts on dashboard

6.10 Notifications (/owner/notifications)

- In-app notification center with filters: Sales, Inventory, Kitchen, AI, Payments
- Status tabs: All, Unread, Read, Critical
- Push notifications via FCM when enabled on your device

6.11 Payments & Plans (/owner/subscription)

- View current plan and trial status
- Compare Starter, Growth, Pro, Enterprise plans
- Upgrade when ready — Growth required for live orders
- Zero commission on all plans

6.12 Refer & Earn (/owner/referrals)

- Your unique referral code (format: BHOJ-{code})
- Share via WhatsApp — earn plan rewards when other owners sign up
- Milestones: 1 referral | 1 month Growth; 3 referrals | 1 month Pro

6.13 Help & Feedback (/owner/feedback)

- Submit feature requests, bug reports, suggestions, or ratings
- Direct line to BhojanOS support team

6.14 Reports (owner/operations)

- AI morning brief with daily insights
- Forecast accuracy and scenario simulation (discounts, ad spend, VIP campaigns)

7. Plans, Trials & Feature Access

BhojanOS charges zero commission on every order — on all plans. You pay for software and intelligence, not per order. Aggregators typically take 20–30% per order forever.

Plan	Price	Live orders	Key features
Starter (Free)	1 0 / m o n t h	No — build only	Storefront setup, 1 user, preview mode
Growth	1 9 9 9 / m o n t h	Yes — 500 orders/mo	Marketing, customer insights, AI coach, 3 users
Pro	1 2 , 9 9 9 / m o n	Yes — unlimited	+ Revenue insights, delivery intel, inventory/recipes
Enterprise	1 4 , 9 9 9 / m o n	Yes — unlimited	+ Multi-outlet, API access, priority support

Trials

- 14-day Growth trial — starts automatically when you publish your store (first go-live)
- 3-day trial — when upgrading to Pro or Growth later from the free storefront
- After trial expires, live orders pause until you upgrade to Growth

Feature gates by plan

Feature	Starter	Growth	Pro	Enterprise
Accept live orders	No	Yes	Yes	Yes
Marketing campaigns	No	Yes	Yes	Yes
Customer insights	No	Yes	Yes	Yes
Delivery intelligence	No	No	Yes	Yes
Inventory / recipes	No	No	Yes	Yes
API access	No	No	No	Yes

8. Going Live & Daily Operations

8.1 Two controls for store availability

- Publish (one-time setup) — wizard step 8; makes storefront public and starts Growth trial
- Store Live Control (daily) — toggle on Dashboard to accept or pause orders today

8.2 Share your store

Your public store URL: `https://www.bhojanos.com/k/{your-slug}`

- Copy link from Dashboard and share on WhatsApp, Instagram, Google Maps, or print QR codes
- Customers can install your storefront as a PWA on their phones too
- Preview mode: add `?preview=customer` to test as a guest without placing real orders

8.3 Order handling workflow

1. Customer places order on your storefront !' appears in Orders tab with sound
2. Accept the order !' status moves to Accepted

3. Start preparing food !' mark Preparing
4. Assign delivery partner and rider !' Out for delivery (add tracking link)
5. Confirm delivery !' Delivered
6. For COD: collect payment on delivery. For Razorpay: payment is already captured online.

9. Customer Journey — Browse to Delivery

This section explains what your customers experience on your branded storefront.

9.1 Discover & browse

Step	Customer action	URL
Land on store	See trending dishes, categories, offers	/k/{slug}/
Browse menu	Search, filter veg/non-veg, view prices	/k/{slug}/menu
Add to cart	Select items, adjust quantities	Floating cart icon
View policies	Terms, privacy, refund policy	/k/{slug}/terms etc.

9.2 Checkout & payment

1. Customer opens cart and proceeds to Checkout (/k/{slug}/checkout)
2. Selects or adds delivery address (with map pin for distance calculation)
3. Chooses delivery time slot (scheduled or ASAP)
4. Applies promo code if available
5. Selects payment: Cash on Delivery or Razorpay (UPI, cards, wallets)
6. Places order — receives confirmation page and order ID

9.3 Order tracking & account

- Live tracking page: /k/{slug}/order/{orderId} — status updates in real time
- My Orders: /k/{slug}/orders — order history (login required)
- Account & saved addresses for repeat customers
- Meal subscription page if you enable subscriptions

9.4 Delivery (customer side)

- Delivery fee calculated from your zone settings (free radius, max radius, per-km fee)
- ETA shown: prep time + ~4 minutes per kilometre
- Customer receives status updates: created !' preparing !' dispatched !' delivered
- Push notifications if customer has installed the PWA and allowed alerts

10. Design & Branding

- Upload your logo in Storefront !' General settings
- Kitchen name and description appear on storefront header
- Menu photos — high-quality images increase conversion; use Menu Builder upload
- Theme uses your brand colors with BhojanOS platform chrome
- WhatsApp share templates on Dashboard use your store name automatically
- FSSAI number displayed on storefront when configured in KYC

11. Troubleshooting & FAQ

Problem	Solution
Stuck on login / redirect	Hard refresh (Ctrl+Shift+R). Ensure same sign-in method as registration.
Dashboard shows loading forever	Check internet. Sign out and sign in. Contact support if persists.
Orders not appearing	Confirm Store Live Control is ON. Check Growth trial has not expired.
Cannot publish store	Complete all required setup steps. Add at least 3 menu items with prices.
Customer cannot order	Store must be published + live. Check delivery address is in your zone.
Payment failed (Razorpay)	Verify Razorpay is enabled in Settings. Customer retries or uses COD.
Old app version / bugs	Accept PWA update prompt or reinstall from browser.
Wrong store name showing	Update in Storefront!' General. Clear browser cache.
Tenant not linked to account	Sign out/in. Backend auto-repairs ownedTenantIds on login.

12. Support & Contact

- Email: bhojanos26@gmail.com
- In-app: Owner portal!' Help & Feedback (/owner/feedback)
- Website: <https://www.bhojanos.com/contact>
- Security page: <https://www.bhojanos.com/security>
